

U.S. ARMY CORPS OF ENGINEERS REGULATORY PROGRAM APPROVED JURISDICTIONAL DETERMINATION FORM (INTERIM) NAVIGABLE WATERS PROTECTION RULE

I. ADMINISTRATIVE INFORMATION

Completion Date of Approved Jurisdictional Determination (AJD): 1/27/2021

ORM Number: SPA2021-024

Associated JDs: N/A

Review Area Location¹: State/Territory: New Mexico City: Pueblo of Santa Ana

County/Parish/Borough: Sandoval

Center Coordinates of Review Area: Latitude 35.35222 Longitude -106.536825

II. FINDINGS

A. Summary: Check all that apply. At least one box from the following list MUST be selected. Complete the corresponding sections/tables and summarize data sources.

\boxtimes	The review area is comprised entirely of dry land (i.e., there are no waters or water features, including
	wetlands, of any kind in the entire review area). Rationale: The project is located in the historic
	floodplain of the Rio Grande. The applicant "Pueblo of Santa Ana, Department of Natural Resources"
	prepared a wetland delineation report which determined no Corps Jurisdiction wetlands had formed in
	the historic floodplain.

There are "navigable waters of the United States" within Rivers and	nd Harbors Act jurisdiction within the
review area (complete table in Section II.B).	

- ☐ There are "waters of the United States" within Clean Water Act jurisdiction within the review area (complete appropriate tables in Section II.C).
- ☐ There are waters or water features excluded from Clean Water Act jurisdiction within the review area (complete table in Section II.D).

² If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

³ A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

C. Additional comments to support AJD: Reviewing satellite imagery for the dates of April 22, 2017, May 08, 2009, May 11, 2005, and May 14, 2005 shows when the Rio Grande is at high flows the review area does not inundate with water. This demonstrates that the review is above the ordinary high water mark. Upon review of satellite imagery for the dates listed above and in consideration of the Wetland Delineation and Determination Bar 3 Upper Terrace Habitat Enhancement Project provided Pueblo of Santa Ana,

⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

⁵ Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.
