

Acequias Irrigation System, New Mexico

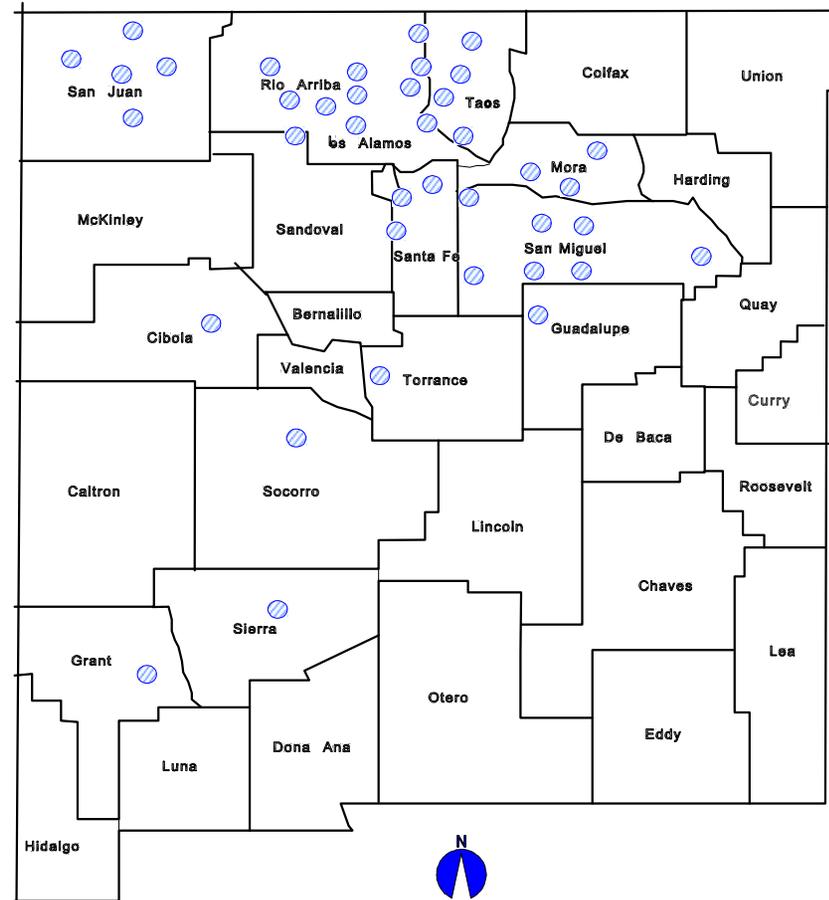

(Construction General)

There about one thousand acequias throughout the state of New Mexico, most of which are located in north-central New Mexico.

The project consists of the protection and restoration of the river diversions and associated canals. To date, forty-nine acequias restoration and protection projects have been completed.

In FY 2007, construction will be completed for Turley-Manzanares and two section 215 projects, plans and specifications will be complete for Cuchillo, NEPA compliance will be completed for four section 215 projects, and plans and specifications will be initiated for Los Vigiles.

The project is funded under the Construction General appropriation.

STATE OF NEW MEXICO

⊙ Completed Acequias rehabilitation projects.
