**ADDITIONAL INFORMATION SUPPORTING NJD (e.g., paragraph 1 – site conditions; paragraphs 2-3 – rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 – site information on waters of the U.S. occurring onsite):** The subject site was created as a borrow site for a nearby highway construction project many years in the past. The borrow pit has since filled with groundwater.

The borrow pit has captured groundwater and supports a wetland area that provides habitat for resident and migratory wildlife. This wetland does not have a surface hydrological connection to any other water of the U.S. The site is located on private land and is not used for any interstate commerce purpose.
