

# TNTCX Services & Technical Capabilities

Our team has over 100 years of combined experience working with Indigenous people both in the United States and across the globe. Our staff are experienced in field work, contracting, project management, and consultation with the aim of solving complex engineering challenges in Indian Country. Our unique skill set allows us to help USACE Districts, DOD Agencies, and other Federal agencies fulfill their Federal Trust responsibilities to Tribal Nations.

Our staff have served as District Tribal Liaisons, thus we understand the process and procedures USACE team members utilize to both construct projects and consult and coordinate impacts to Tribes. Below are just a few services we offer. Allow us to join your Team today!

- Tribal Consultation Program planning
- Cross-cultural communication training
- Tribal Consultation meeting planning and facilitation
- Preparation of Agreement documents for Tribal Nations
- Preparation of ethnographic overviews and assessments of Tribal lands
- Archaeological Resources Protection Act (ARPA) consultation, including treatment plan, damage assessments, and criminal investigations
- Assessment and documentation of Tribal Traditional Cultural Properties (TCPs)
- Archival and ethno-historic research
- Tribal Oral History
- Tribal Consultation Training
- Identification of culturally sensitive biotic communities important to Tribes
- Water Resource Infrastructure Planning
- Tribal Outreach Programs
- Cultural Resource Sensitive Training
- Phase, I, II, and III Archaeological Survey in support of Tribal Consultation
