

**US Army Corps of
Engineers®**

Quality Control System (RMS-QCS) For Contractors

April 27, 2017

NOTICE:

Registration opens Feb. 21, 2017

New U.S. Army Corps of Engineers RMS (QCS) Training

US Army Corps of Engineers (Corps) construction contracts require that the use of the computer-based Resident Management System (RMS) be used for all Contractor quality control functions. The Quality Control System (QCS) is the Contractor's Quality Control module of the Government's RMS program and was developed to assist the contractor in providing contract-required data to the Corps of Engineers. By taking advantage of the monitoring and reporting capabilities of this program, the Contractor can perform quality control activities consistent with the requirements of a Corps of Engineers contract. It is a user-friendly comprehensive system for the efficient and effective management of Corps construction contracts.

Who Should Attend This Course:

Contractor personnel directly involved with daily quality control, reports, submittals, or pay requests for US Army Corps of Engineers' construction contracts.

How You Will Benefit:

- More effective administration and management of Corps contracts.
- Shorten the RMS\QCS learning curve.
- An inexpensive and convenient training opportunity.
- An opportunity to get informed answers to your questions.

What You Should Bring:

- You may bring your own QCS manual (optional). The manual is approximately 228 pages. You can download the QCS manual from the RMS website at http://rms.usace.army.mil/datafiles/rms_qcs_manuals/qcs_manual_2_38.pdf
- It is highly recommended that students visit the RMS\QCS website. It will be advantageous for the student to be familiar with the RMS\QCS website prior to class attendance.

Date & Time:

This one-session course will be held April 27, 2017, from: 8:00 a.m. to 12:00 p.m.

Location & Lodging:
