CAP - OVERVIEW

Continuing Authorities Program (CAP) provides USACE with the authority to solve water-resource, flood-risk mitigation, and environmental restoration problems in partnership with local sponsors without the need to obtain specific Congressional authorization. CAP projects have two phases, a feasibility phase followed by a design and implementation phase.

Feasibility

- Development of alternative plans
- Cost estimates
- Environmental analysis
- Real estate assessments
- federally funded up to \$100,000

Design & Implementation

- Final design
- Preparation of contract plans
- Permitting
- Real-estate acquisition
- Project contracting and construction
- Activities required to implement the project

The non-federal sponsor cost share entails a contribution mix of **cash**, **lands**, **easements**, **rights-of-way**, **relocations** and **disposal areas** and/or **work-in-kind**. When a project is completed, continued operation and maintenance of the project is the responsibility of the non-federal sponsor.

ACEQUIA PROGRAM

- ❑ **AUTHORIZATION:** Section 1113 of Water Resources Develop WRDA 1986,
- ❑ **TYPE OF PROJECTS:** Rehabilitation and Preservation of NM Historic Irrigation Ditches (Acequia)
- ❑ **PROJECT PHASE:** Design and Construction
- ❑ **BACKGROUND:** The community irrigation ditch systems in New Mexico known as acequias provide irrigation water to about 160,000 acres on an estimated 12,000 farms and date from the eighteenth century. In 1986, Congress authorized the acequia program in WRDA to rehabilitate and preserve the acequias in NM due to their significance in the settlement and development of the western United States, has cultural and historic value to the region.

TRIBAL PARTNERSHIP PROGRAM (TPP)

- ❑ **Corps Authority:** Section 203 of the Water Resources Development Act (WRDA) 2000, as amended.
- ❑ **Opportunity:** Through a partnership, a Tribal Government and the Corps address water resource issues on Tribal lands.
 - Water-related planning activities to study water resource issues
 - Study, design and construction of water resources projects.
 - Study, design and construct projects for the preservation of cultural resources or natural resources.
