B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE

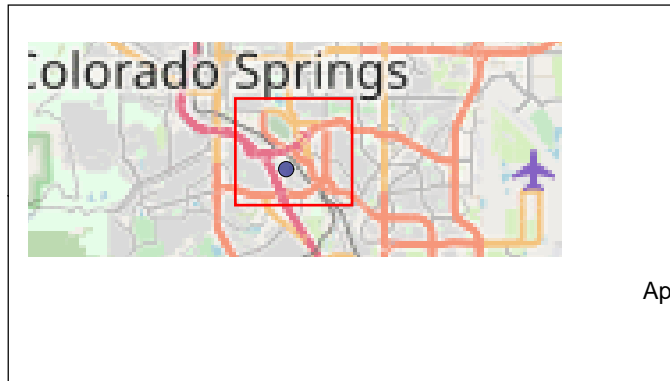

REVIEW AREA ONLY INCLUDES DRY LAND: Property was examined and no waters of the U.S. in property boundary. The basis for this approved JD is that the proposed project area is determined to be entirely uplands and does not contain waters of the U.S... However, it has been identified that Relatively Permanent Waters (Fountain Creek & Spring Creek) are located adjacent to the project area that flow directly or indirectly into Traditional Navigable Waters that have more than a speculative or insubstantial effect on the physical, chemical and/or biological integrity of a Traditional Navigable Water.

¹ This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.
