EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc. (EDR).

TARGET PROPERTY INFORMATION

ADDRESS

ALBUQUERQUE, NM 87109

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records within the requested search area for the following databases:

FEDERAL RECORDS

Proposed NPL	Proposed National Priority List Sites
Delisted NPL	National Priority List Deletions
NPL RECOVERY	Federal Superfund Liens
ERNS	Emergency Response Notification System
HMIRS	Hazardous Materials Information Reporting System
DOD	Department of Defense Sites
FUDS	Formerly Used Defense Sites
US BROWNFIELDS	A Listing of Brownfields Sites
CONSENT	Superfund (CERCLA) Consent Decrees
UMTRA	Uranium Mill Tailings Sites
ODI	Open Dump Inventory
TRIS	Toxic Chemical Release Inventory System
TSCA	Toxic Substances Control Act
FTTS	FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)
SSTS	Section 7 Tracking Systems
ICIS	Integrated Compliance Information System
LUCIS	Land Use Control Information System
RADINFO	Radiation Information Database
US CDL	Clandestine Drug Labs
PADS	PCB Activity Database System
MLTS	Material Licensing Tracking System
MINES	Mines Master Index File

STATE AND LOCAL RECORDS

SHWS	This state does not maintain a SHWS list. See the Federal CERCLIS list and Federal NPL list.
SWF/LF	Solid Waste Facilities
SWRCY	Recycling Facility Listing
SPILLS	Spill Data
INST CONTROL	Sites with Institutional Controls

EDR PROPRIETARY RECORDS

Manufactured Gas Plants... EDR Proprietary Manufactured Gas Plants

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

The Map ID column refers to the Map ID-Focus Map(s) of the listed site.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL RECORDS

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 01/25/2007 has revealed that there are 2 NPL sites within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>
<i>SOUTH VALLEY</i>	<i>BROADWAY & WOODWARD</i>	<i>0-11</i>
<i>AT&SF (ALBUQUERQUE)</i>	<i>3300 2ND STREET , SW</i>	<i>0-11</i>

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 11/28/2006 has revealed that there are 3 CERCLIS sites within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>
<i>SOUTH VALLEY</i>	<i>BROADWAY & WOODWARD</i>	<i>0-11</i>
<i>AT&SF (ALBUQUERQUE)</i>	<i>3300 2ND STREET , SW</i>	<i>0-11</i>
<i>USGS WELL, ISLETA AT BARCELONA</i>	<i>2550 ISLETA BLVD.</i>	<i>39-10,11</i>

EXECUTIVE SUMMARY

CERCLIS-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 12/20/2006 has revealed that there are 5 CERC-NFRAP sites within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>
CASA CHRYSLER/JEEP-MITSUBISHI	9733 COORS RD NW	7-4
SPARTON TECHNOLOGY INC	9261 COORS RD NW	9-4
TREATMENT PLANT #1	2100 2ND SW	27-9
GE AIRCRAFT ENGINES	336 WOODWARD SE	35-11
OLD CONOCO REFINERY	3100 2ND S.W.	36-11

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 01/04/2007 has revealed that there are 2 CORRACTS sites within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>
SPARTON TECHNOLOGY INC	9261 COORS RD NW	9-4
GE AIRCRAFT ENGINES	336 WOODWARD SE	35-11

RCRAInfo: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System(RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month Large quantity generators generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 06/13/2006 has revealed that there are 2 RCRA-TSDF sites within the searched area.

EXECUTIVE SUMMARY

INST CONTROLS: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROL list, as provided by EDR, and dated 01/24/2007 has revealed that there are 2 US INST CONTROL sites within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>
SOUTH VALLEY	BROADWAY & WOODWARD	0-11
AT&SF (ALBUQUERQUE)	3300 2ND STREET , SW	0-11

RODS: Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid the cleanup.

A review of the ROD list, as provided by EDR, and dated 01/10/2007 has revealed that there are 2 ROD sites within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>
SOUTH VALLEY	BROADWAY & WOODWARD	0-11
AT&SF (ALBUQUERQUE)	3300 2ND STREET , SW	0-11

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 01/18/2007 has revealed that there are 10 FINDS sites within the searched area.

EXECUTIVE SUMMARY

RAATS: The RCRA Administration Action Tracking System contains records based on enforcement actions issued under RCRA and pertaining to major violators. It includes administrative and civil actions brought by the United States Environmental Protection Agency. The source of this database is the U.S. EPA.

A review of the RAATS list, as provided by EDR, and dated 04/17/1995 has revealed that there is 1 RAATS site within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>
GE AIRCRAFT ENGINES	336 WOODWARD SE	35-11

STATE AND LOCAL RECORDS

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the New Mexico Environmental Department's List of Past & Current Leak Sites by Location.

A review of the LUST list, as provided by EDR, and dated 08/01/2006 has revealed that there are 49 LUST sites within the searched area.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

	Event: Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.		
	Event Date: 06/29/2001		
	Event: Igration of Contaminated Groundwater under Control, Yes, Migration of Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the facility.

National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

NM-TEMPO (New Mexico - Tools for Environmental Management and Protection Organizations) is an Integrated Management System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

Site Description: THE USGS WELL AT ISLETA & BARCELONA IS A SHALLOW MONITOR WELL INSTALLED BY THE USGS AS PART OF THE NATIONAL WATER QUALITY ASSESSMENT PROGRAM (NAWQG). THE WELL LOCATION WAS CHOSEN BY COMPUTER.

CERCLIS Assessment History:

Action:	DISCOVERY
Date Started:	Not reported
Date Completed:	06/19/1995
Priority Level:	Not reported
Action:	PRELIMINARY ASSESSMENT
Date Started:	Not reported
Date Completed:	10/17/1995
Priority Level:	High
Action:	SITE INSPECTION
Date Started:	Not reported
Date Completed:	01/22/1999
Priority Level:	NFRAP (No Futher Remedial Action Planned)

FINDS:
Other Pertinent Environmental Activity Identified at Site

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used

Other Pertinent Environmental Activity Identified at Site

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

	Summary Details:		
	Conditions at listing July 1982): The South Valley Site covers about 2 square miles south of Albuquerque, New Mexico. In 1979, wells in the San Jose well field became contaminated by organic compounds, forcing closing of one private well and two Albuquerque municipal wells. Numerous sources are suspected of contributing to the problem. This is the top priority site in New Mexico. Status July 1983): The State, with a grant of 80,200 made available through the Clean Water Act, is attempting to determine the extent of ground water pollution and possible specific sources of contaminants. In addition, EPA is evaluating methods of restoring the capacity of the Albuquerque wells lost due to contamination. EPA is starting a remedial investigation/feasibility study to determine the type and extent of contamination at the site and identify alternatives for remedial action.

	AT&SF (ALBUQUERQUE) (Continued)		1000242125
	Alias Address: 3300 2ND STREET , SW ALBUQUERQUE, NM 87102 Site Description: The AT&SF Albuquerque Superfund Site (the Site or the facility) is located at 3300 Second Street, SW, in the South Valley area of the City of Albuquerque, Bernalillo County, New Mexico. It is the location of the former Atchison, Topeka and Santa Fe Railway Company (AT&SF) Tie Treating Plant. The Site was listed on the EPA National Priorities List (NPL) in December 1994. The Burlington Northern and Santa Fe Railway Company (BNSF Railway), a successor railroad corporation to AT& SF and a wholly owned subsidiary of the Burlington Northern Santa Fe Corp. (BNSF), is the owner of the Site. BNSF 2002. Prior to the merger of AT&SF with and into the Burlington Northern Railroad Company (BNRR) to form the BNSF in 1996, the Site was owned by AT&SF. The topography of the Site and the surrounding area is generally flat and gently slopes down toward the Rio Grande. The Rio Grande, which is located approximately one mile west of the site, is the nearest surface water body. The Site consists of approximately 28 acres of the more than 85- acre former AT& SF Tie Treating Plant property (the plant property), which is an inactive wood treating facility that used creosote and other compounds in its wood preservation processes. The EPA is the lead agency for Site response activity under the Comprehensive Environmental Response, Compensation & Liability Act (CERCLA or Superfund), 42 U.S.C. 9601 et seq. The New Mexico Environment Department (NMED) is the support agency for CERCLA response action. The City of Albuquerque Environmental Health Department (AEHD) and Bernalillo County have also provided invaluable support on this Site. The facility is a part of the plant property that was acquired by AT& SF in three parcels totaling more than 85 acres in 1907, and was constructed from 1907 to 1908. The facility operated as a wood pressure treatment plant from March 1908 to January 1972. The facility used primarily creosote and oil mixtures for the manufacture of pressure treated wood products, including railroad cross ties, bridge ties, switch ties, bridge timbers, road crossing materials, bridge piling materials, lumber, stock pen posts and fence posts. In 1972, the plant was totally dismantled and the only physical feature remaining on-site is the wastewater reservoir/wastewater sump. The reports of annual proceedings from the American Wood-Preserver's Association (AWPA) indicate that a number of AT&SF personnel involved in wood treatment were active in that trade organization over the years, starting almost from its inception early in the twentieth century. In fact, five AT&SF employees, including two individuals who had served as key personnel of the AT&SF Albuquerque plant, served as AWPAs president and/ or vice president between 1906 and 1965. The Site can be divided into five general areas of environmental impacts from the plant wood treating operations. These areas are set forth as follows. -Wood Treatment Area: This is the part of the Site where the pressure treatment processes employed by AT&SF to treat wood were applied. The facility utilized full cell processes for pressure treatment that included the Bethell and Burnettizing (zinc chloride), and Marine processes, as well as the empty cell Rueping process. Plants such as this one involved the use of large pressure treatment cylinders called "retorts" utilizing steam and high pressure to inject creosote or other agents, such as zinc chloride, into wooden crossties, poles, posts, or the like. According to AWPAs records, the two retorts that became operational at this plant in 1908 would have consisted of two riveted cylinders of approximately 6 feet in width and 132 feet in diameter, which were typical size retort units. Within two decades, some newer plants being constructed elsewhere utilized welded shell construction and were in many cases 8 feet in width. As late as 1964, according to Forest Service, U. S. Department of Agriculture (USDA) statistics as reproduced in AWPAs proceedings, approximately 63% of all retorts in the nation were either 6 feet or 8 feet in diameter. The facility was reported to have added a third retort in 1953, according to AWPAs records. Plant capacity was listed by AWPAs as		

MAP FINDINGS
FOCUS MAP 11

Map ID	Site	Database(s)	EPA ID Number
	AT&SF (ALBUQUERQUE) (Continued) 1,025,000 standard 6" x 8" x 6' rail ties per year in 1914, which may have been expanded by the addition of the third retort in 1953. The facility's only significant modernization involving change to processes occurred in 1953 or 1954 when a vapor drying system was installed. This may have reduced the quantity of plant creosote releases, but it is possible that this was only a feature of the additional retort installed that year, as the two 1908 retorts of the same size continued to operate. Further, this process modification occurred after the greatest period of United States' production of pressure treated rail ties, when national production was on a downward curve. This was probably due to the build-out of the American railroad system and the development of other competing modes of transportation, as well as the general success of wood preservation efforts like this one in extending the life of rail ties. In any event, according to USDA statistics as reported in the AWPAs proceedings, national production of treated cross and switch ties (the principal product of the AT&SF plant) decreased from 150,104,330 cubic feet in 1945 to 52,702,688 cubic feet in 1963. As a result, any such modification would likely have been inconsequential when measured against cumulative historical environmental impacts of this facility. It is also clear that with the advent of modern environmental regulatory controls, such as pollutant effluent limitations in the 1970s, many facilities like this old plant were eventually closed. The dismantling of this plant was completed in early 1972. The most common wood preservatives used in pressure treatment at this plant were creosote and creosote-petroleum mixtures. From 1914 through 1926, some materials were treated with zinc chloride, followed by a creosote-petroleum mixture. Additionally, documents from the 1950s and early 1960s refer to experiments and small scale projects performed in this area using solutions containing 2% to 10% pentachlorophenol (PCP). AWPAs records document the usage of PCP at the facility in the 1960s as a wood treating preservative, but do not specify the scale or purpose of its usage. AWPAs 1965. Borax/boric acid was also reportedly used at the plant as a flame retardant treatment. Releases to the process area are evident where raw materials were unloaded from railcars and stored in above ground tanks. However, the most significant creosote or other preservative waste streams in a typical pressure treating plant like this one would occur routinely with process condensate, vacuum water, and wash water from operation of the retorts. Besides the general accumulation of process wastes from the operations of the retorts, the mechanisms for release may also have been from spillage and leakage at the point of transfer from the rail car to the sump or from leakage at the underground sump and pipes that transported the creosote from the unloading sump to the above ground tanks. Storm water run off from process areas and other contaminated areas, is also typically a significant source of pollution by creosote or other preservative wastes. The overall pattern of handling plant waste water at the Site with a settling pond, sumps, and ditches is fairly typical of older creosoting plants that were not constructed to treat the large volumes of creosote contaminated waste water they produced. In addition to being a source of creosote contamination and its associated hazardous constituents, the treatment process area is also a potential source of zinc contamination. One of the structures noted on the plant blueprint was a Zinc Sump. Other than this, and the operation of the zinc chloride process at the plant, there is no known information on possible sources of zinc. A review of zinc contamination in the soil shows that most of the elevated soil concentrations occur in the treatment process area. Actual quantities of PCP production usage and waste products are unknown. Although the plant used PCP in the 1960s, it is not believed to be as significant as the use of other preservatives at the plant, as there have not been significant levels of associated 2, 3, 7, 8-tetrachlorodibenzo-p-dioxin (TCDD or dioxin) detected in wastes present at the site. -Drip Tracks: Tram tracks used for moving wood to and from the treatment cylinders are referred to as drip tracks. The standard		1000242125

AT&SF (ALBUQUERQUE) (Continued)

1000242125

operating practice in the wood treatment plant was to hold the treated lumber for a period of 24 hours on drip tracks in the vicinity of the retorts. Based upon this operating practice and a plant layout furnished by TRC, it is believed that the tram track areas, including those areas just outside the pressure treatment cylinders, were used as drip track areas. The drip tracks areas show impacts by both creosote and zinc.

-Tie Storage Area: This area was where the treated ties were stored and allowed to dry. Releases to this area would be restricted largely to drippings from treated products. With the advent of vapor drying in 1953, the amount of drippings was reduced to some extent. Creosote drippings accumulate at locations where ties are repeatedly stacked, but the accumulations may tend to dry out between loads.

-Wastewater Reservoir: Condensate water from the air compressor and retort process waste water from the oil/water separator tanks or sumps in the pressure treatment building were discharged to the wastewater reservoir. As noted above, this condensate water would have generally contained substantial quantities of creosote constituents. Also, sap water derived from wood before treating with creosote was discharged to this reservoir. A sump located in the northwestern corner of the reservoir, which is separated from the reservoir by an earthen berm, handled domestic sewage from on-site company housing.

-Wastewater Discharge Ditch: Overflow from the wastewater reservoir was handled by the sump, which discharged to the Barillas Ditch bounding the west side of the property. The facility records show that plant wastewater was discharged in one of two fashions. Water that the plant considered to be clean (i.e., boiler blow-down, surplus vacuum pump water, and cooling jacket water) was discharged to the clear-water ditch bounding the south side of the property. However, according to analysis of typical creosoting facility waste streams, boiler blow down could contain soluble phosphates and other chemicals used as boiler compounds. Further, sealing water from "wet" vacuum pumps will likely contain light oils from the preservative used in the retorts. From 1972, when the plant was dismantled, to 1982, no activity reportedly took place at the plant. In 1982, portions of the property were leased to Bredero Price, Inc., which operated a pipe storage and coating facility for approximately one year. The pipe coating operation was of limited duration and none of the samples analyzed and reported suggest that the pipe coating operation had an impact on the Site. Bredero's storage needs prompted the consolidation of the plant's demolition debris. Much of the plant debris was pushed into the east end of the wastewater reservoir. Other debris, consisting largely of soil and uprooted trees, was bulldozed into a large pile at the southeast end of the plant. The debris in the wastewater reservoir was removed in 1990. In 1987, an auto unloading facility was built north of the Site outside of the treatment area. Adjacent to the auto facility is an intermodal ramp used for unloading and loading containers and trailers on railcars. In July and August of 1990, BNSF removed and disposed of approximately 8,250 tons of creosote-tainted debris in connection with a state enforcement action. This debris was comprised of plant demolition wreckage that had been placed into the east end of the wastewater reservoir by Bredero Price, Inc. Due to contact with the creosote in the reservoir, much of the debris was tainted with creosote. Approximately 45,000 square feet of the wastewater reservoir were excavated to a depth of 2 to 5 feet. Two areas with total SVOC concentrations above 41.1 mg/kg were excavated from the tie storage area in 1996. The excavated area was backfilled with clean soil and confirmation testing was performed to ensure that the contaminated soil had been excavated. In April 1999, sludge and process residue from the wastewater reservoir (WWR) was excavated from the Site. This removal action was in response to a Unilateral Administrative Order (UAO) for a Removal Response Action issued by the EPA, which specifically called for BNSF to remove process residues located within the old wastewater reservoir. Approximately 1,100 cubic yards of process residues and highly contaminated soil were in the WWR. The UAO

1000242125

required the removal of process residues, plus a minimum of 6 inches of underlying soil. Because of the fluid nature of this material and a lack of a well-defined contact between process residues and soil, up to 2 feet of underlying soil was removed. At locations, upon instructions from EPA, excavations were as deep as 6 feet. The removal action was completed on April 30, 1999. A total of approximately 83 gondola cars (approximately 6,012 tons) were filled and transported by rail to Safety Kleen Inc.'s Lone Mountain (RCRA Subtitle C) Landfill in Waynoka, Oklahoma, for disposal. As a direct result of this removal action, the most highly contaminated soil and sludge has already been removed from the Site. As stated previously, there are still elevated concentrations of contamination in the soil at the Site, but at levels that are several orders of magnitude below the levels that were in the WWR prior to the removal. In 1999, three recovery trenches were installed in the WWR to collect dense non-aqueous phase liquid (DNAPL) through a gravity-feed system. In 2000, five recovery pumps were installed to extract DNAPL from the Shallow and Intermediate Aquifers. These pumps were installed in monitoring wells MW-2B, MW-18A, MW-19B, MW-22B and MW-23B, in connection with the Site Remedial Investigation and Feasibility Study (RI/FS). The recovery wells have been pumping DNAPL from the aquifer since 2000. The EPA performed a potentially responsible party (PRP) search to determine the identities of the former owners and operators of the site. In 1907, AT&SF purchased the land comprising the plant property and the Site. The Site was used by the AT&SF to treat various wood products (railroad ties, bridge timbers, fence posts, etc.) with a solution of creosote and oil from 1908 to 1972. The Site includes much of the dismantled Tie Treatment Plant and any area where a hazardous substance has been deposited, stored, disposed of, or placed or otherwise come to be located through a release. The following statement is quoted from Form 10-K, filed by the Burlington Northern Santa Fe Corporation with the United States Securities and Exchange Commission for fiscal year ended December 31, 2001, at p. I. BNSF 2002. Burlington Northern Santa Fe Corporation (BNSF) was incorporated in the State of Delaware on December 16, 1994. On September 22, 1995, the stockholders of Burlington Northern Inc. (BNI) and Santa Fe Pacific Corporation (SFP) became the stockholders of BNSF pursuant to a business combination of the two companies. To effect the combination, BNSF was formed to act as the parent holding company of BNI and SFP. BNI and SFP each owned a large, Class I railroad: Burlington Northern Railroad Company (BNRR) and the Atchison, Topeka and Santa Fe Railway Company (ATSF), respectively. On December 30, 1996, BNI merged with and into SFP. On December 31, 1996, ATSF merged with and into BNRR, and BNRR changed its name to The Burlington Northern and Santa Fe Railway Company (BNSF Railway). On January 2, 1998, SFP merged with and into BNSF Railway. The BNSF Railway is a wholly owned subsidiary of BNSF, which has its principal executive offices at 2650 Lou Menck Drive, Second Floor, Fort Worth, Texas 76131-2830. As the sole owner and operator of this facility and the successor corporation to AT&SF, which held the same status, the BNSF Railway is the only PRP identified by the EPA for the Site. Based upon existing factual knowledge about the operations and history of this facility, no other parties fall within the elements of those persons who are potentially liable under section 107(a) of CERCLA, 42 U.S.C. § 9607(a). A Record of Decision (ROD) selecting remedial actions for both soil and groundwater at the AT&SF site was signed in June 2002.

Summary Details:

Conditions at Proposal October 14, 1992): The Atchison, Topeka and Santa Fe AT SF) tie treatment plant is an abandoned wood-preserving facility located at 3300 Second Street SW in the South Valley area of Albuquerque, Bernalillo County, New Mexico. The plant is in a commercial area of an Albuquerque suburb. The plant, owned by the AT SF Railway Co., treated various wood products railroad ties, bridge timbers, fence posts, etc.) with a solution of creosote and oil from 1908 until 1972. Washdown waters, spills, and leakage were disposed of in an unlined impoundment. The facility, except for a waste water impoundment and a sump, was dismantled in 1972. The impoundment and sump cover approximately 3.4 acres. Sludge from the impoundment contains hazardous substances, including arsenic, barium, lead, and creosote constituents 3,4-benzofluoranthene, benzo(a)pyrene, and naphthalene), according to a 1990 report of the New Mexico Environmental Improvement Division (NMEID). No sludge is present

in the sump, but analyses of soil from the sump area detected hazardous substances, including barium, acenaphthylene, anthracene, fluoranthene, and benzo(a)pyrene, according to a 1990 report of an AT&SF contractor. The report indicates that fluorene, 2-methylnaphthalene, naphthalene, phenanthrene, pyrene, acenaphthene, anthracene, benene, dibenzofuran, ethylbenene, fluoranthene, and xylenes were detected in on-site monitoring wells. The Valley, or Basin Fill, Aquifer is the principal aquifer in the Albuquerque area. There are 15 City of Albuquerque and 3 Kirtland Air Force Base wells within 4 miles of the site. Run-off from the site enters an irrigation ditch south of the site. From this point, the drainage water travels through a series of canals until it enters the Rio Grande River 7 miles downstream from the site. No drinking water intakes are located along the canals and river. However, they are used as recreational areas and fisheries stocked by the State. Portions of the downstream segment along the Rio Grande are also considered wetlands according to Federal and State inventories. NMEID sampling conducted in January 1987 indicates that creosote constituents may have migrated from the site to surface water. Further documentation is required to establish that surface water is indeed contaminated. Status December 1994): Since the site was proposed to the NPL in 1992, AT&SF has entered into an Administrative Order on Consent (AOC) with the U.S. EPA Region 6 to conduct and finance a Remedial Investigation and Feasibility Study (RI/FS) for the site. The purpose of the RI/FS is to determine the nature and extent of contamination and any threat to the public health, welfare or the environment caused by the release or threatened release of hazardous substances, pollutants, or contaminants at or from the site, and to evaluate remedial alternatives to address the contamination. Sampling activities began in December 1993. The description of the site release) is based on information available at the time the site was scored. The description may change as additional information is gathered on the sources and extent of contamination. See 56 FR 5600, February 11, 1991 or subsequent FR notices.)

	AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.		
	ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.		
	The NEI (National Emissions Inventory) database contains information

on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

NM-TEMPO (New Mexico - Tools for Environmental Management and Protection Organizations) is an Integrated Management System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo Corrective Action Summary:

Event: CA Prioritization, Facility or area was assigned a high corrective action priority.

Section 4

**EPA Waste Code
Addendum**

EPA Waste Codes Addendum

Code	Description
D001	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
D002	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
D003	A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
D005	BARIUM
D006	CADMIUM
D007	CHROMIUM
D008	LEAD
D009	MERCURY
D011	SILVER
D035	METHYL ETHYL KETONE
F003	THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
F005	THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT

Databases Searched and Update Dates

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 01/25/2007	Source: EPA
Date Data Arrived at EDR: 01/31/2007	Telephone: N/A
Date Made Active in Reports: 03/12/2007	Last EDR Contact: 01/31/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 04/30/2007
	Data Release Frequency: Quarterly

Telephone 206-553-8665

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 09/27/2006	Source: EPA
Date Data Arrived at EDR: 11/01/2006	Telephone: N/A
Date Made Active in Reports: 11/22/2006	Last EDR Contact: 02/23/2007
Number of Days to Update: 21	Next Scheduled EDR Contact: 04/30/2007
	Data Release Frequency: Quarterly

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/28/2006	Source: EPA
Date Data Arrived at EDR: 01/31/2007	Telephone: N/A
Date Made Active in Reports: 03/12/2007	Last EDR Contact: 01/31/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 04/30/2007
	Data Release Frequency: Quarterly

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL RECOVERY: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 03/26/2007
Number of Days to Update: 56	Next Scheduled EDR Contact: 05/21/2007
	Data Release Frequency: No Update Planned

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 11/28/2006	Source: EPA
Date Data Arrived at EDR: 12/19/2006	Telephone: 703-603-8960
Date Made Active in Reports: 01/29/2007	Last EDR Contact: 03/21/2007
Number of Days to Update: 41	Next Scheduled EDR Contact: 06/18/2007
	Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 12/20/2006	Source: EPA
Date Data Arrived at EDR: 01/29/2007	Telephone: 703-603-8960
Date Made Active in Reports: 02/27/2007	Last EDR Contact: 03/19/2007
Number of Days to Update: 29	Next Scheduled EDR Contact: 06/18/2007
	Data Release Frequency: Quarterly

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 01/04/2007	Source: EPA
Date Data Arrived at EDR: 01/18/2007	Telephone: 800-424-9346
Date Made Active in Reports: 02/27/2007	Last EDR Contact: 03/05/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 06/04/2007
	Data Release Frequency: Quarterly

RCRA: Resource Conservation and Recovery Act Information

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/13/2006	Source: EPA
Date Data Arrived at EDR: 06/28/2006	Telephone: 800-424-9346
Date Made Active in Reports: 08/23/2006	Last EDR Contact: 02/27/2007
Number of Days to Update: 56	Next Scheduled EDR Contact: 04/16/2007
	Data Release Frequency: Quarterly

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2006	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 01/24/2007	Telephone: 202-260-2342
Date Made Active in Reports: 03/12/2007	Last EDR Contact: 01/24/2007
Number of Days to Update: 47	Next Scheduled EDR Contact: 04/23/2007
	Data Release Frequency: Annually

HMIRS: Hazardous Materials Information Reporting System

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 11/28/2006	Source: U.S. Department of Transportation
Date Data Arrived at EDR: 01/17/2007	Telephone: 202-366-4555
Date Made Active in Reports: 02/27/2007	Last EDR Contact: 01/17/2007
Number of Days to Update: 41	Next Scheduled EDR Contact: 04/16/2007
	Data Release Frequency: Annually

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 01/24/2007	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/31/2007	Telephone: 703-603-8905
Date Made Active in Reports: 04/04/2007	Last EDR Contact: 04/02/2007
Number of Days to Update: 63	Next Scheduled EDR Contact: 07/02/2007
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 01/24/2007	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/31/2007	Telephone: 703-603-8905
Date Made Active in Reports: 02/27/2007	Last EDR Contact: 04/02/2007
Number of Days to Update: 27	Next Scheduled EDR Contact: 07/02/2007
	Data Release Frequency: Varies

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

DOD: Department of Defense Sites

This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Government Version: 12/31/2005	Source: USGS
Date Data Arrived at EDR: 11/10/2006	Telephone: 703-692-8801
Date Made Active in Reports: 01/11/2007	Last EDR Contact: 02/08/2007
Number of Days to Update: 62	Next Scheduled EDR Contact: 05/07/2007
	Data Release Frequency: Semi-Annually

FUDS: Formerly Used Defense Sites

The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

Date of Government Version: 12/31/2005	Source: U.S. Army Corps of Engineers
Date Data Arrived at EDR: 09/20/2006	Telephone: 202-528-4285
Date Made Active in Reports: 11/22/2006	Last EDR Contact: 04/02/2007
Number of Days to Update: 63	Next Scheduled EDR Contact: 07/02/2007
	Data Release Frequency: Varies

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Date of Government Version: 01/29/2007	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/31/2007	Telephone: 202-566-2777
Date Made Active in Reports: 04/04/2007	Last EDR Contact: 03/12/2007
Number of Days to Update: 63	Next Scheduled EDR Contact: 06/11/2007
	Data Release Frequency: Semi-Annually

CONSENT: Superfund (CERCLA) Consent Decrees

Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.

Date of Government Version: 12/14/2004	Source: Department of Justice, Consent Decree Library
Date Data Arrived at EDR: 02/15/2005	Telephone: Varies
Date Made Active in Reports: 04/25/2005	Last EDR Contact: 02/06/2007
Number of Days to Update: 69	Next Scheduled EDR Contact: 04/23/2007
	Data Release Frequency: Varies

ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 01/10/2007	Source: EPA
Date Data Arrived at EDR: 01/24/2007	Telephone: 703-416-0223
Date Made Active in Reports: 02/27/2007	Last EDR Contact: 03/27/2007
Number of Days to Update: 34	Next Scheduled EDR Contact: 07/02/2007
	Data Release Frequency: Annually

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 12/31/2005	Source: Department of Energy
Date Data Arrived at EDR: 11/08/2006	Telephone: 505-845-0011
Date Made Active in Reports: 01/29/2007	Last EDR Contact: 03/20/2007
Number of Days to Update: 82	Next Scheduled EDR Contact: 06/18/2007
	Data Release Frequency: Varies

ODI: Open Dump Inventory

An open dump is defined as a disposal facility that does not comply with one or more of the Part 257 or Part 258 Subtitle D Criteria.

Date of Government Version: 06/30/1985	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/09/2004	Telephone: 800-424-9346
Date Made Active in Reports: 09/17/2004	Last EDR Contact: 06/09/2004
Number of Days to Update: 39	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

TRIS: Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2004	Source: EPA
Date Data Arrived at EDR: 06/22/2006	Telephone: 202-566-0250
Date Made Active in Reports: 08/23/2006	Last EDR Contact: 03/20/2007
Number of Days to Update: 62	Next Scheduled EDR Contact: 06/18/2007
	Data Release Frequency: Annually

TSCA: Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2002	Source: EPA
Date Data Arrived at EDR: 04/14/2006	Telephone: 202-260-5521
Date Made Active in Reports: 05/30/2006	Last EDR Contact: 01/15/2007
Number of Days to Update: 46	Next Scheduled EDR Contact: 04/16/2007
	Data Release Frequency: Every 4 Years

FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 10/19/2006	Source: EPA/Office of Prevention, Pesticides and Toxic Substances
Date Data Arrived at EDR: 10/27/2006	Telephone: 202-566-1667
Date Made Active in Reports: 11/22/2006	Last EDR Contact: 03/19/2007
Number of Days to Update: 26	Next Scheduled EDR Contact: 06/18/2007
	Data Release Frequency: Quarterly

FTTS INSP: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act) A listing of FIFRA/TSCA Tracking System (FTTS) inspections and enforcements.

Date of Government Version: 10/19/2006	Source: EPA
Date Data Arrived at EDR: 10/27/2006	Telephone: 202-566-1667
Date Made Active in Reports: 11/22/2006	Last EDR Contact: 03/19/2007
Number of Days to Update: 26	Next Scheduled EDR Contact: 06/18/2007
	Data Release Frequency: Quarterly

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2004	Source: EPA
Date Data Arrived at EDR: 05/11/2006	Telephone: 202-564-4203

Number of Days to Update: 11	Next Scheduled EDR Contact: 04/16/2007
	Data Release Frequency: Annually

ICIS: Integrated Compliance Information System

The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

Date of Government Version: 11/06/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/02/2007	Telephone: 202-564-5088
Date Made Active in Reports: 04/04/2007	Last EDR Contact: 01/15/2007
Number of Days to Update: 61	Next Scheduled EDR Contact: 04/16/2007
	Data Release Frequency: Quarterly

RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 01/30/2007	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/31/2007	Telephone: 202-343-9775
Date Made Active in Reports: 02/27/2007	Last EDR Contact: 01/31/2007
Number of Days to Update: 27	Next Scheduled EDR Contact: 04/30/2007
	Data Release Frequency: Quarterly

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 12/09/2005	Source: Department of the Navy
Date Data Arrived at EDR: 12/11/2006	Telephone: 843-820-7326
Date Made Active in Reports: 01/11/2007	Last EDR Contact: 03/26/2007
Number of Days to Update: 31	Next Scheduled EDR Contact: 06/11/2007
	Data Release Frequency: Varies

CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 12/01/2006	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 01/08/2007	Telephone: 202-307-1000

Next Scheduled EDR Contact: 07/02/2007
Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995

STATE AND LOCAL RECORDS

SHWS: This state does not maintain a SHWS list. See the Federal CERCLIS list and Federal NPL list.

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

NY MANIFEST: Facility and Manifest Data

Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Child Day Care Providers

Source: Office of Child Development
Telephone: 505-827-7946

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.
