

## Notice of Availability

The U.S. Army Corps of Engineers (Corps), Albuquerque District, has completed the draft **Amended Supplement II Environmental Assessment for the Middle Rio Grande Bosque Restoration Project, Recreation Phase, Bernalillo and Sandoval Counties, New Mexico**. The Corps sent out a Draft Supplemental Environmental Assessment (SEA), entitled “Draft Supplement II Environmental Assessment for the Middle Rio Grande Restoration Project, Recreation Phase, Bernalillo and Sandoval Counties, New Mexico” on May 9, 2016 for a 30-day public review (available for reference at the website provided below). Since that time, a change has been made to the location of the proposed recreation features at Sunset and Central. Due to right of way easements at the northwest side of Central the proposed features would be relocated to the southwest side of Central. This change would have positive results as access to the northwest section of Central is very tight for vehicle access. Therefore, this location change would result in improved public access and safety. The only changes in the Amended Draft SEA reflect this change in the location of the recreation features at the Sunset and Central site.

The Amended draft DSEA will be available at the Central and Unser Library and electronically available for viewing and copying at the Albuquerque District website (under “FONSI/ Environmental Assessments”) at:

<http://www.spa.usace.army.mil/Missions/Environmental/EnvironmentalComplianceDocuments/EnvironmentalAssessmentsFONSI.aspx>

The draft SEA is available for public review and comment from June 8, 2017 to June 22, 2017. Written comments may be sent to:
